Treatment

Extra Air

Energy
Efficient

Hiring our aeration systems on a temporary basis can assist you with:

- Equipment failure
- Flow increase in peak seasons
- Odour problems
- Oxygen supplement during maintenance work

Whenever your aeration system breaks down, is unreliable, or requires upgrade, our fine bubble aeration hire units can come to the rescue! Our system is simple to install and maintain, without stopping the treatment process or draining your reactor.

Our aerators can be installed above existing fixed-to-the-floor diffusers or alongside surface aerators.

Option to supply complete system upon request including blower, manifold, air supply pipes and units. We can also provide you with a control system including control panel, PLC, and DO sensors for optimal operation which can conjoin to any existing control system on site.

Choose the duration of your contract. Contracts are available on a weekly or monthly basis with no minimum period required.

We strive to design a custom-made solution for your plant and your pocket.
